

WHY INSULATE, WHY US?

WHY INSULATE?

Electricity bills, oil bills, and gas bills—all homeowners pay for one or more of these utilities, and wish they paid less. Often many of us do not really know how to control or reduce our utility bills. We resign ourselves to high bills because we think that is the price we have to pay for a comfortable home. We encourage our children to turn off the lights and appliances, but may not recognize the benefits of adding insulation.

WHY SHOULD YOU INSULATE?

Heating and cooling (“space conditioning”) accounts for 50 to 70% of the energy used in the average American home. About 20% goes for heating water. On the other hand, lighting and appliances and everything else account for only 10 to 30% of the energy used in most residences. It makes good sense to turn lights and appliances off when they are not needed, and you’ll save even

more on your energy costs if you reduce the amount of energy needed for heating and cooling.

Unless your home was constructed with special attention to energy efficiency, adding insulation will probably reduce your utility bills. Much of the existing housing stock in the United States is not insulated to the best level. Older homes are likely to use more energy than newer homes, leading to very high heating and air-conditioning bills. Even if you own a new home, adding insulation may save enough money in reduced utility bills to pay for itself within a few years. It will then continue to save you money for as long as you own the home, and increase the resale value of your house.

THE CRUCIAL ROLE OF THERMAL INSULATION

Inadequate insulation and air leakage are leading causes of energy waste in most homes. Insulation saves money and our nation’s limited energy resources. It can also make your house more comfortable by helping to maintain a uniform temperature throughout the house. Walls, ceilings, and floors will be warmer in the winter and cooler in the summer. Insulation can also act

as a sound absorber or barrier, keeping noise levels down.

It is possible to add insulation to almost any house. For instance, in unfinished attics or under the floor over an unheated space. In either case, it is important to choose and install the insulation correctly. At AirTight Insulation we’ll help you make that choice. We have the knowledge and experience to do the job right.

The amount of energy you conserve will depend on several factors: your local climate; the size, shape, and construction of your house; the living habits of your family; the type and efficiency of the heating and cooling systems; and the fuel you use. Once the energy savings have paid for the installation cost, energy conserved is money saved—and the annual savings will increase if utility rates go up.

WHY AIRTIGHT SPRAYFOAM?

AirTight SprayFoam® is the most versatile, energy-efficient insulation available today. Not only is it the only product on the market that has an aged R-Value of 7 per inch (two times all other products) but it also adds tremendous structural integrity and creates a total air and vapor barrier at the same time. All AirTight SprayFoam® dealers undergo intense training both in the field as well as in the classroom. You will find our personnel are the most professional and knowledgeable in the industry. Backed by AirTight Insulation, which has almost two decades of experience in the insulation business, rest assured your home is in good hands with your local AirTight SprayFoam® representative.

WARRANTY

AIRTIGHT SPRAY FOAM® SYSTEMS LIFETIME LIMITED WARRANTY

Name: _____
Address: _____
City of Foam: _____

AirTight Spray Foam Systems, subject to conditions and limitations listed herein, warrants that the AirTight Spray Foam product (“Product”), when installed according to its installation instruction by an AirTight certified dealer, will perform as indicated in the Product Specification literature current at the time of the installation. This Lifetime Limited Warranty (“Warranty”) is transferable if home changes ownership. AirTight Spray Foam sole responsibility under this Warranty shall be to repair or replace any defective Product limited to the cost of the Product material only. AirTight Insulation shall not be responsible for any labor or other costs whatsoever related to the removal or installation of either the original or replacement Product.

AirTight Spray Foam Systems shall have no liability under this Warranty for defects or failure of the Product caused by improper storage of components used to produce the Product; and installation not performed in strict adherence to its written instructions; any damage due to abuse or neglect of the Product; and damage due to fire, storm, or other acts of God; accident, defects, failure, or damage caused by materials adjacent to the Product; or damage caused by alteration of the Product after completion of its installation.

This Warranty is made in lieu of all other warranties, whether arising under statute, or in tort, or by implication of law or otherwise. All implied warranties, including warranties of merchantability and fitness for particular purpose, are limited in duration to the length of this Warranty. AirTight Spray Foam Systems shall not be liable for any incidental or consequential damages, arising from a breach of any express or implied warranty or for the cost of removing, installing, or reinstalling any repair or replacement.

Some states do not allow limitations on how long an implied warranty lasts or the exclusion or limitation of incidental or consequential damages, so the above limitations or exclusions may not apply to you. This Warranty gives you specific legal rights, and you may also have other rights, which vary from jurisdiction to jurisdiction.

To obtain performance under this Warranty, the customer must notify AirTight Spray Foam Systems in writing of the defect immediately after its discovery and must submit with the notice proof of the date of purchase along with the date, location and description of the circumstances under which the defect occurred or was first noticed. Notice shall be given in writing to:

AirTight Spray Foam, Warranty Department, 145 Newborn Rd., P.O. Box 301, Kennesaw, GA 30143
